# ES / 4RXV

E-mini S&P 500 | ESU6 | 14 JUN - 04 SEP 2026

52,531 completed bars / 16,723 reversal events / 60 trade dates

**AT LEAST 1 FOLLOW-THROUGH**

**75.7%**

A reversal followed by 1+ same-direction candle.

**AT LEAST 2 FOLLOW-THROUGHS**

**48.8%**

A reversal followed by 2+ same-direction candles.

## HOW FAR DOES A REVERSAL EXTEND?

Extra candles after the reversal • all-hours event rates

## THE SHAPE OF A RUN

Same-direction candles • completed runs

| 2 | 6 | 21 |
|---|---|---|
| MEDIAN | P90 | OBSERVED MAX |

| | |
|---|---|
| Exactly 3 candles | 17.2% |
| 3 or more candles | 48.7% |
| Mean run length | 3.14 |

P90: nine in ten completed runs are this long or shorter.

## FOUR SESSIONS. FOUR DIFFERENT PACES.

New York time assumed • follow-through rates vs. frequency of 3+ candle runs

| SESSION | ≥1 FOLLOW | ≥2 FOLLOW | ≥3 FOLLOW | 3+ RUNS / HR | MEDIAN / DAY 3+ runs | P90 / DAY 3+ runs |
|---|---|---|---|---|---|---|
| ASIA 20:00-03:00 | 75.4% | 47.7% | 30.7% | 2.5 | 15 | 34.1 |
| LONDON 03:00-09:00 | 77.1% | 50.8% | 32.1% | 3.9 | 21 | 37.5 |
| NEW YORK AM 09:30-12:00 | 75.9% | 49.0% | 32.1% | 19.5 | 41 | 83.7 |
| NEW YORK PM 12:00-16:45 | 75.3% | 48.4% | 31.1% | 7.8 | 25 | 58.7 |

## 3+ CANDLE RUNS PER TRADE DATE

| 54 | 109 | 247.1 |
|---|---|---|
| P10 | MEDIAN | P90 |

Mean 135.7 • All hours, 18:00-17:00 • Counts, not probabilities

## WILL THE RUN ADD ONE MORE?

| | |
|---|---|
| 2 candles → 3 | 64.4% |
| 3 candles → 4 | 64.6% |
| 5 candles → 6 | 65.1% |

**READ THE SEQUENCE**

### Reversal + 2 follow-through candles = a 3-candle run.

A run is one streak, not overlapping three-bar windows. Run percentiles are not next-candle probabilities.

**CANDLE CONTINUATION ≠ TRADE WIN RATE**

Historical descriptive statistics only. No entries, stops, costs, slippage or executable fills are modeled.
Runs reset at session boundaries. Follow-through rates use horizon-specific right-censoring.
First/final boundary runs are excluded from exact completed-run distributions. One likely terminal bar is removed per trade date.
All-hours totals also include unlisted gaps. Clock-hour rates assume the stated session durations; timezone remains unconfirmed.
