GC / 10RXV

Gold futures | GCZ6 | 14 JUN - 04 SEP 2026

67,104 completed bars / 20,551 reversal events / 60 trade dates

AT LEAST 1 FOLLOW-THROUGH

76.2%

A reversal followed by 1+ same-direction candle.

AT LEAST 2 FOLLOW-THROUGHS

50.4%

A reversal followed by 2+ same-direction candles.

HOW FAR DOES A REVERSAL EXTEND?

Extra candles after the reversal • all-hours event rates

THE SHAPE OF A RUN

Same-direction candles • completed runs

3	7	30
MEDIAN	P90	OBSERVED MAX

Exactly 3 candles	16.4%
3 or more candles	50.3%
Mean run length	3.26

P90: nine in ten completed runs are this long or shorter.

FOUR SESSIONS. FOUR DIFFERENT PACES.

New York time assumed • follow-through rates vs. frequency of 3+ candle runs

SESSION	≥1 FOLLOW	≥2 FOLLOW	≥3 FOLLOW	3+ RUNS / HR	MEDIAN / DAY 3+ runs	P90 / DAY 3+ runs
ASIA 20:00-03:00	76.6%	51.4%	34.9%	7.1	46	78
LONDON 03:00-09:00	76.2%	49.9%	33.6%	6.8	36	71.2
NEW YORK AM 09:30-12:00	75.4%	50.1%	33.5%	15.0	35	50
NEW YORK PM 12:00-16:45	76.8%	50.7%	34.1%	5.6	18.5	32.7

3+ CANDLE RUNS PER TRADE DATE

102.5	170	257.5
P10	MEDIAN	P90

Mean 172.2 • All hours, 18:00-17:00 • Counts, not probabilities

WILL THE RUN ADD ONE MORE?

2 candles → 3	66.1%
3 candles → 4	67.4%
5 candles → 6	65.3%

READ THE SEQUENCE

Reversal + 2 follow-through candles = a 3-candle run.

A run is one streak, not overlapping three-bar windows. Run percentiles are not next-candle probabilities.

CANDLE CONTINUATION ≠ TRADE WIN RATE

Historical descriptive statistics only. No entries, stops, costs, slippage or executable fills are modeled.
Runs reset at session boundaries. Follow-through rates use horizon-specific right-censoring.
First/final boundary runs are excluded from exact completed-run distributions. One likely terminal bar is removed per trade date.
All-hours totals also include unlisted gaps. Clock-hour rates assume the stated session durations; timezone remains unconfirmed.
